
Customer Success Spotlight

Industry: Retail distribution

Location: Triadelphia, West Virginia

Challenges

- Increase pallet movement without needing to continue to lease manned equipment
- Streamline process flow through centralized route management
- Improve dock-to-stock timing (point of receipt to putaway zones, or replenishment drops to picking zones for putaway)

Solution

Vision Guided Vehicles (VGVs)

- VGV pallet trucks transport goods to putaway zones
- VGV pallet trucks transport for support-related activities, such as cardboard disposal, trash collection and delivery, and plastic recycling efforts

Results

- Reduced costs associated with pallet movement of goods
- Improved efficiency of dock-to-stock times through centralized delivery
- Increased average pallet hours from 18.9 to 38.8 per hour/or 205% improvement in moving goods to putaway zones for the same labor rate

“Seegrid vision guided pallet trucks are a labor savings and productivity solution for Cabela’s. With the help of Seegrid, we have seen a 205% productivity improvement in our ability to transport goods to putaway zones. VGVs provide employees with a high tech tool for optimizing the transportation of pallets.”
